

Hi Guys!

This is Norbert, ex German banker, and you probably know me from Germanbankersecreet site where I teach ordinary people how to make extraordinary money with binary options trading free of charge... it's a little "hobby" of mine to share my knowledge and I get to see places as I travel the world holding seminars...

.. as this one that shows me teaching options trading at the Kempinski hotel in Berlin..

This year I'm holding these seminars all over the world so you can get in touch with me about the schedule over email however these seminars cost a fortune.. so be prepared to get shocked :)

As the online project Germanbankersecret grew,

thousands of students flocked to it to learn the secrets of options trading.. It started to get overwhelming..

My system is not THAT complicated but chart watching and basic understanding of trading was a necessity.. and many of my students had a ton of questions and needed further studying and support..

And your number one request always was, can this bollinger bands strategy I developed be automated for hands free trading?

This was a great challenge and I decided to take it.

So In order to make things simpler i joined forces with a few very creative programmers that helped me fully automate the system.

The results pleasantly surprised me. I was expecting software to make at least 70% realistic profit per month but it actually exceeded all my expectations.

The first 7 betatesters from my group could turn \$500 deposits into **\$2271** in just 31 days!

Fully verified by Binary Verify 3rd party monitoring !

ASSET	POSITION	AMOUNT	ENTRY RATE	CLOSING RATE	PAYOUT	DATE	STATUS
OIL	Put	33€	98.915	98.905	57.42€		Won
EUR/USD	Put	33€	1.36994				Won
USD/CAD	Put						Won
AUD/USD	Call	30€	0.88025	0.88136	52.2€	23:00 20/01/14	Lost
EUR/USD	Call					11:00 20/01/14	Won
GBP/USD	Call					09:00 20/01/14	Won
OIL	Call	30€	92.345	92.455	52.2€	9:00 10/01/14	Won
USD/JPY	Call	30€	104.923	104.934	52.2€		Won
			104.107	104.178	57.42€	15:00 19/12/13	Won
					57.42€	14:45 19/12/13	Won

[=> Click here](#)

That is because by automating the bollinger bands algorithm the system could take at least 67% more trades than we could take by manually trading the system!

Moreover we could eliminate almost every losing trade by using the stealth filter which monitors the price action in over 20 trading brokers and detects the slightest fluctuation ahead of time which gives a chance for lightning fast execution before the rest of the traders can react!

That alone could increase the profit by over 214%!

Moreover I wanted to eliminate any human error factor so the goal was to make fully automated system without any human intervention.

No need to monitor charts anymore or calculate bolinger bands!

That's right, now the ONLY thing needed to make money for you trading options with my system is to hit the Start trading button..

1 simple click.. really just one mouseclick.

So what's the catch? As you might expect my products and seminars cost a fortune and you would guess right, I was about to launch it for **\$2400 per sale**.

That's right this push button money making software was scheduled to launch in 2 months.

And the icing on the cake is that,

Even at \$2400 it would be a steal because this special software can easily make this amount back 3-5x times in less than 30 days.

**AUTO TRADES MULTIPLE CURRENCIES:
SUCH AS GBP/USD, AUD/USD, USD/JPY, EUR/GBP AND
EVEN GOLD, SILVER, OIL AND APPLE STOCK!**

HUGE AMOUNT OF WINNERS

**VERY FEW LOSING TRADES
(HIGHLY PROFITABLE ROBOT)**

But unlike all these scammers that you probably came across selling networking products I wanted YOU to experience it live and in action!

I realized not everyone has so much money to pay upfront and I wanted to make this opportunity available for everyone!

So I came up with a plan..

Make money first and pay later. Let the software proof its worth and pay for itself!

Here is the deal

I will not even ask you for any payment details. this is not a pay in 30 days automatically subscription.. No need for creditcard info, bank info or any other mumbo jumbo.

That's right. Download the German Binary Robot today free of charge! I will not ask for your creditcard, no string attached. Just enter your name and E-mail below and click the Download GermanBinary Robot " Button and you are good to go..

[=> Click here](#)

Again: This is completely obligation free. You download now and earn money.. then you decide if you want to continue or simply stop trading.

So I challenge you to take a free 1 month trial and make at least (you probably make a LOT more) \$4800 (double of what the software cost will be) profit with it so the software will pay for itself + you got an additional of \$2400 in your pocket for your time and efforts. Does that sound fair?

By choosing this model I eliminated all the risk for you.. download for free

use for free and

make money no strings attached!

It just can't get any better than this

option #1
Buy It For ~~\$3600~~
Only \$2400

BONUS BOLLINGER BANDS SYSTEM

And here is your bonus in case you want to trade manually for additional profits!

That is my famous Bollinger Band system that became so popular among my students!

Login to your [Binary Robot members area](#) and click "**Manual Trading**". Then follow simple instructions below

"Bollinger Bands" Our Indicator That **Guarantees The Profits!**

I'd like to now show you an example with 3 different charts here... to show you the right "entry" signals for our trading. Signals to trade arise sometimes in minutes so you need to be able to spot them quickly.

What I recommend is to trade currencies such as EUR, USD, GBP, JPY, CAD and AUD. However, other currencies are worth checking out as well... and even raw materials like Gold and Silver!

Here are a few chart examples:

A Wonderful Chart!

All the red arrows are "entry" signals. Whenever a green candle touches the upper end, a red candle follows. When a red candle touches the bottom end, a green candle follows.

Here's what this means for us: If a green candle touches the upper end, we make a PUT/DOWN/SELL trade for 5 euro

If a red candle touches the bottom end of the chart, we make a CALL/UP/BUY trade expecting the currency / commodity / index / stock to rise.

In this example, we would have gotten around 14 entry signals within 1 and a half hours.

In the end, the chart moves around the middle line... time for us to look at another currency as no trade opportunity is in sight here.

A "STAY AWAY" Chart.

This chart shows only minimal movement. Everything moves within a narrow channel, no gains are to be made here.

Such charts are to be found during low trading periods (market openings and closures) as well as currencies that have low trading volume.

An Interesting Chart

At the beginning of this session, there was a calm phase... the market is opening on Monday. The market experienced a narrow channel with almost no movement... but then the action happened and around 11 potential trade windows that opened up, where you could use 1 signal many times in a row.

The KEY to success here is to be quick. Once a signal shows itself, don't hesitate to pull the trigger. If you lose the first trade, start the next one (with 10 Euros)... if you lose the second, start the third...

As you can see, no more than 3 candles arose in the same direction. That's a Winning trade situation all the way!

Always remember: Look for moving and active charts like this and you're going to pocket a TON of money!

Money Management

As you will experience, the first trade will not always be a winner. To compensate for this, we will double up the trade amount after the first trade. If the first 5 EUR/USD trade is a loss, then double-up but place the 2nd trade in the same direction immediately. I cannot stress this enough. Be quick! **Also, check your chart frequently to ensure that you are indeed trading in the right direction!**

Please Note:

If a candle touches the top Bollinger Band, we make a Sell/Down/Put trade, as we assume that for at LEAST 4 trades, the chart will move down!

If a candle touches the bottom Bollinger Band, we make a Buy/Call/Up Trade!

Entry Signal = Exit Signal

Sometimes when we place a trade, the chart comes to the same position as when we opened the trade. In this case, we receive the investment money back, without loss or profit.

Should such a situation happen, do NOT double up but repeat the same trade! If such "PUSH" situations arise often, it means that the market is slow moving (not optimal to trade), so just change the currency or wait.

Win Percentage Analysis

We Analysed Over 10,000 Consecutive Trades,
To Calculate The Percentage Of Success With
Every Single Trade. These Are The Results.

1st Trade - Win Rate = 67,54%
2th Trade - Win Rate = 79,10%
3th Trade - Win Rate = 98,22%
4th Trade - Win Rate = 99,79%

Every Trade Makes Up To 91% Profit...
every 60 seconds (1 Minute)

= Huge Profits , NO Risk!

The Ultimate Long-Term Test

Security and Stability are the most important factors to earn a long-term income. That's why we documented a long-term test analyzing over 10,000 trades! These are the results!

The first trade is going to be a winner with **67.54%** probability

The second trade (if the first was a loss) is going to win **79.10%** of the time!

Even if you lost both trades trade number 3 is going to be a winner with a percentage of **98.22%**!

The 4th trade wins **99.79%** of the time and in my last 4 months of trading, this had happened only once for me to execute it (and Win)

Important: After a losing trade, make sure to place the next trade IMMEDIATELY. It's important to not lose any time!

Lets Recap:

What Happens With A "Push" Trade?
How Do I Trade After A Loss?
What DO I Need To Do When..

1° Trade - Win Chance Of 69,54%

75% Profit with only 1 Trade!

1. Choose your Currency Pair!

Choose a pair where you see lots of movement and where you can find a clear "entry signal"

2. Start with 5 Euros (or 5 Dollars).

We always start with 5 bucks. Professionals can start higher. But only do that if you have sufficient funds so that the double-up process can be completed all the way through. Please be careful. You can make double the money but its also risky. I strongly advise you to start trading with higher amounts only after you've nailed the concept!

3. Buying or Selling?

Up/Call/Buy is our action when the red candle touches the bottom Bollinger Band. We speculate that the trend is going to reverse now.

Down/Put/Sell Means we **SELL**. This happens when a green candle touches the top Bollinger Band! We speculate on a red candle following soon!

2° Trade - 79,10% Win Rate!

3.5 USD or 3.5 EUR With Only 3-6 Clicks!

1. Currency pair stays the same if you made a loss!

If you happen to have a losing trade, do not change the currency pair! Keep trading in the same direction until you close the trading cycle with a win!

2. Increase of trading amount - the right steps

Use 10 EUR(or USD) for your 2nd trade after a loss. If this trade happens to be a loss too, use 25 EUR(or USD) and lastly, 50 EUR(or USD) In case the broker doesn't support those amounts, you need to be quick and place, for example, two \$25 dollar trades to come up to the sum of \$50 USD.

Always make sure you use our strategy and double check. The trend is your friend. If you follow it, the win will come and it will make up for all losing trades!

3. If you lose, double and repeat!

Losing trades happen a lot but they are not your enemy! We simply balance them out with a bigger win at the end of our trading cycle.
Green candle touches top band => Sell!

4. We confirm and wait!

Click the brokerage's Confirm or Start button, then wait and observe the trade. If you see that the trade might not win, you can already prepare the follow-up trade (double the amount). Remember: same direction, same order, and just double the amount.

Important: If a trade closes without win or loss, repeat the trade with the same amount. DON'T double up yet... double only if you lose the trade! If too many push situations impede your trading, then use another currency with more market movement!

(Put/Down/Sell Order)

Red candle touches bottom band =>

(Buy/Up/ Call Order)

If you keep this in mind, you will succeed!

4. Confirm and check!

Again. Confirm your trade and make sure you did everything right. Be prepared to place double the amount with the same order in the same direction if the trade is a loss and you will soon have a nice win!
